

CURRICULUM VITAE

Jeffrey A. Nittrouer

Assistant Professor, Rice University
Sedimentology and Stratigraphy Laboratory
Dept. of Earth, Environmental and Planetary Sciences
Houston, Texas USA

Email contact: nittrouer@rice.edu,

Website: www.sedimentology.rice.edu

Telephone: office: +1 713 348-4886
mobile: +1 206 251-2444

Educational Diplomas

2010 PhD, Geological Sciences, University of Texas, Austin, USA

2006 MS, Earth and Environmental Sciences, Tulane University, New Orleans, USA

2003 BS, Geology, University of Washington, Seattle, USA

Snapshot: Research

- Focuses: understanding linkages between sediment transport processes, fluid dynamics, sediment accumulation patterns, and flooding of fluvial-deltaic and coastal systems
- Aims: to evaluate earth's surface evolution, focusing on environments where changing boundary conditions including water discharge and sediment supply impact flooding hazards and landscape development
- Methods: detailed, targeted measurements from modern systems to inform numerical models; validated solutions to guide new, theoretically based findings
- Ongoing and future directions: (1) evaluating the fate of fluvial-deltaic systems globally, under changing climate conditions; (2) unraveling the impacts of natural variability and external perturbations (e.g., humans, tectonics, climate) on water movement and sediment dispersal; (3) assessing linkages between the biosphere and equilibrium states and hydrology of systems (e.g., river channel geometry)

Snapshot: Teaching

- Significant experience developing lecture, laboratory, and field-based courses across all student levels, from non-major undergraduates to advanced graduate students
- Classroom philosophy blends traditional lecture techniques (e.g., deriving analytical solutions), computational exercises (modeling), and new technology (e.g., machine learning) exposing students to a range of approaches that foster critical-thinking skills
- Extensive experience designing, planning, and leading national/international field trips to sedimentary systems, in particular, fluvial and coastal. Leveraging field trips to demonstrate advanced instruments and to collect data for primary research

Snapshot: Mentoring

- Aims: to educate, train and equip mentees to solve independently science problems; to provide an understanding of geosciences as an inherently multidisciplinary field, and champion collaborations; to leverage hydrology and sedimentology to inform about earth's evolution from minutes to centuries
- Successes: In eight years, four MSc students, and four PhD students completed. All PhD students are now post-doctoral research scientists, with three having been awarded prestigious National Science Foundation Postdoctoral Research Fellowships

Employment History

Assistant Professor

2012- Department of Earth, Environmental and Planetary Sciences, Rice University, Houston

NSF Earth Sciences Post-doctoral Research Fellow and Assistant Instructor

2010-2012 Department of Geology, and Department of Civil and Environmental Engineering, University of Illinois, Urbana-Champaign

Research and Teaching Assistantships

2006-2010 Jackson School of Geosciences, University of Texas, Austin

2003-2006 Department of Earth and Environmental Sciences, Tulane University, New Orleans

Professional Affiliations

American Geophysical Union

Geological Society of America

Professional References (listed alphabetically by last name)

Experts in the Field

- Dr. James Best** Professor, Depts. of Geology, Geography, Mechanical Science and Engineering, and Dept. of Civil and Environmental Engineering, University of Illinois, Urbana-Champaign (jimbest@illinois.edu)
Fellow of the American Geophysical Union
- Dr. Bill Dietrich** Professor, Department of Earth and Planetary Sciences, University of California, Berkeley (bill@eps.berkeley.edu)
Member of the National Academy of Sciences
- Dr. Ton Hoitink** Professor, Department of Environmental Sciences, Wageningen University, Wageningen (ton.hoitink@wur.nl)
Editor, Journal of Geophysical Research Earth Surface
- Dr. Gail Kineke** Professor, Dept. of Earth and Environmental Sciences, Boston College, Chestnut Hill (gail.kineke.1@bc.edu)
Former department chair, and close international collaborator
- Dr. Michael Lamb** Professor, Division of Geological and Planetary Sciences, California Institute of Technology, Pasadena (mpl@gps.caltech.edu)
Fellow of the American Geophysical Union
- Dr. David Mohrig*** Professor and Associate Dean of Research, Department of Geological Sciences, Jackson School of Geosciences, University of Texas, Austin (mohrig@jsg.utexas.edu) [*PhD Mentor]
Fellow of the American Geophysical Union
- Dr. Gary Parker** Professor, Depts. of Civil and Environmental Engineering, and Geology, University of Illinois, Urbana-Champaign (parkerg@illinois.edu)
Member of the National Academy of Sciences

Departmental Colleagues

- Dr. Gerald Dickens** Professor, Department of Earth, Environmental and Planetary Sciences, Rice University, Houston (jerry@rice.edu)
- Dr. John Anderson** Professor Emeritus, Department of Earth, Environmental and Planetary Sciences, Rice University, Houston (johna@rice.edu)
- Dr. Richard Gordon** Professor, Department of Earth, Environmental and Planetary Sciences, Rice University, Houston (rgg@rice.edu)

Administrative Experiences: International, Multidisciplinary Collaborations

My career goal is to continue pursuing top-tier scientific research, through organizing and leading international coalitions of scientists. I have held a wide variety of management positions: the demands of my research program have allowed me to amass such experiences and uniquely to thrive in these roles. I have developed programs worldwide with scientists studying a variety of disciplines. These include a five-year NSF-sponsored project for which I coordinated twelve principle investigators from the USA and China. I have developed and currently manage an international research consortium focusing on earth and environmental studies at Lake Baikal (a UNESCO World Heritage Site). This group includes bio-geochemists, hydrologists, and geomorphologists from five countries. These experiences require advanced interpersonal skills to integrate and synthesize science. My track record for research funding documents my ability to bridge disciplines: my collaborators include specialists from fields of engineering, biology, economics, and sociology. In today's highly competitive funding climate, it is critical to facilitate science research via interactions among traditionally and nontraditionally aligned fields.

Supervised Students

- [11] Eric Barefoot, PhD, matriculated 2016 (*expected completion: May, 2021*)
- [10] Chenliang Wu, PhD, 2015-2020, currently post-doc, Yonsei University, Korea
- [9] Tian Dong, PhD, 2015-2020, currently NSF post-doc, University of Texas at Austin
- [8] Andrew Moodie, PhD, 2014-2020, currently NSF post-doc, University of Texas at Austin
- [7] Brandee Carlson, PhD, 2015-2020, currently: NSF post-doc, University of Colorado
- [5] Brian Demet, MS, 2014-2016
- [4] Maya Stokes, undergraduate honors research thesis, 2014-2015
- [3] Sarah Huff, MS, 2013-2015
- [2] Tian Dong, MS, 2013-2015
- [1] Kaitlin Moran, 2013-2015

International Co-supervised Students, Visiting at Rice University

- [3] 2017: Zhaoying Li (PhD), Ocean University of China, Dept. of Marine Geology Qingdao, China
- [2] 2016: Manuel Bagoni (PhD), Dept. of Civil, Environmental and Architectural Engineering, University of Padova, Padova, Italy
- [1] 2016: Jan Pietron (PhD), Dept. of Physical Geography, Stockholm University, Stockholm, Sweden

Post-doctoral Research Mentoring

- [5] Dr. Julia Cisneros, starting autumn, 2020
- [4] Dr. Kieran Dunne, 2019 – (ongoing)
- [3] Dr. Hongbo Ma, 2014-2019, currently: research scientist, University of Arkansas
- [2] Dr. Travis Swanson, 2016-2018, currently: assistant professor, Georgia Southern University
- [1] Dr. Jorge Lorenzo-Trueba, 2013-2014, currently: associate professor, Montclair State University

Funding Record: [total funds raised since 2010: \$1,597,000]

- 2020-2022 National Science Foundation; *Geoscience Opportunities for Leadership in Diversity – Expanding the Network (GOLD-EN)*; **lead PI**, \$300,000
- 2018-2021 National Science Foundation; *Geomorphology and Land-use Dynamics: Collaborative Research: Flocculation Dynamics in the Fluvial to Marine Transition*; **lead PI**, \$290,000 to Rice University
- 2014-2018 National Science Foundation; *Coastal SEES Collaborative Research: Morphologic, Socioeconomic and Engineering Sustainability of Massively Anthropic Coastal Deltas: the Compelling Case of the Huanghe*; **lead PI**, \$2,000,000 total award with \$598,000 to Rice University
- 2014-2015 National Science Foundation; *Collaborative: International Deltas Meeting: Genesis, Dynamics, Modeling, and Sustainable Development*; **lead PI** \$32,000
- 2013-2015 Shell Center for Sustainability; *The stress nexus of coastlines: Population development, infrastructure security, and morphological dynamics of the Upper Texas Gulf Coast*; **lead PI**, \$207,000
- 2011-2012 National Science Foundation Rapid-Response Grant; *Mississippi Flood of 2011 - Investigation of Initial Impact on the Landscape*; \$125,000
- 2010-2012 National Science Foundation Earth Sciences Postdoctoral Research Fellowship; University of Illinois, Urbana-Champaign; *Field observations and modeling of backwater effects on bed material sequestration and fluvial kinematics in the lowermost Mississippi River*; **lead PI**, \$170,000

Teaching Experiences – evaluations available on request

Rice University, Lead Instructor [2012-2020]:

- [1] Introductory Geological Sciences (eight semesters, approximately 50 students per semester, non-majors survey course)
- [2] Mechanics of Sediment Transport (three semesters, approximately 15 students per semester, graduate-student and advanced-undergraduate course)
- [3] Sedimentary Basin Analysis (seven semesters, approximately 15 students per semester, graduate-student and advanced-undergraduate course)
- [4] Advanced Geomorphology (two semesters, approximately 15 students per semester, graduate-student and advanced-undergraduate course)
- [5] Sedimentology, Stratigraphy and Earth Systems (five semesters, approximately 10 students per semester, sophomore/junior-level geosciences course)
- [6] Special Seminar on Artificial Intelligence and Machine Learning (one semester, approximately 30 students, graduate-student and advanced-undergraduate course)

University of Illinois, Assistant Instructor [2010-2012]

- [1] Sediment transport dynamics of large river systems and the stratigraphic record (one semester, approximately fifteen students, graduate-student and advanced-undergraduate course)

University of Texas, Laboratory Instructor [2006-2010]

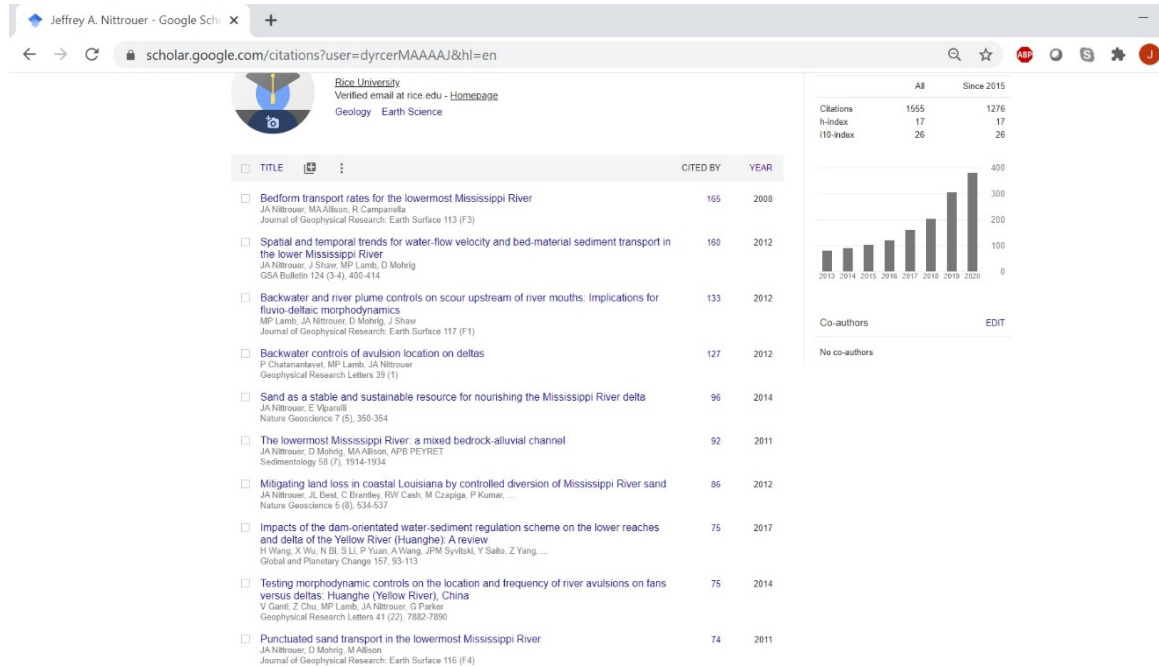

- [1] Sedimentary Rocks (two semesters, approximately thirty students, undergraduate course)

Tulane University, Laboratory Instructor [2003-2006]

- [1] Survey of Geology (two semesters, approximately thirty students, undergraduate course)

Conference/Meeting Abstracts

Full citation list available upon request. Synopsis: 110 conference abstracts in total, from 2003-2020, including 50 presentations by supervised students and post-doctoral research scientists. Conferences include: American Geophysical Union Fall Meeting (AGU), European Geophysical Union (EGU) General Assembly, Geological Society of America (GSA) Annual Scientific Meeting, International Geographical Union (IGU) Regional Conference, Canadian Geophysical Union (CGU) Annual Meeting, Lunar and Planetary Science Conference, American Association of Petroleum Geologists (AAPG) Annual Convention and Exhibition, Society for Sedimentary Geology (SEPM) Gulf Coast Section Annual Meeting, Coastal and Estuarine Research Foundation (CERF) Conference, and River, Coastal Estuarine Morphodynamics (RCEM) Symposium

Community and University Service

2012-2020: Solicited Reviews for Community Journals: 1. *Estuarine, Coastal and Shelf Science*, 2. *Geology*, 3. *Journal of Geophysical Research*, *Earth Surface*, 4. *Geophysical Research Letters*, 5. *Journal of Hydrology*, 6. *Sedimentology*, 7. *Marine Geology*, 8. *Proceedings of the National Academy of Science*, 9. *Water Resources Research*

2018: American Geophysical Union Fall Meeting (Washington, D. C.), session convener: [1] *River deltas: sediment accumulators and biogeochemical reactors*, Earth and Planetary Surface Processes Section;

2018: American Geophysical Union Fall Meeting (Washington, D. C.), session convener: [2] *Further research into the cause and impacts of the 2017 hurricanes with applications of flood warning and inundation mapping during storms*, Natural Hazards Section

2017: American Geophysical Union Fall Meeting (New Orleans), session convener: [1] *Sediment transport mechanics, morphologic expressions and depositional patterns of fine-grained dispersal systems*, Earth and Planetary Surface Processes Section;

2017: American Geophysical Union Fall Meeting (New Orleans), session convener: [2] *Dynamic Atmosphere, Oceans, and Landscapes: Impacts of the 2017 Atlantic Hurricane Season on Earth's Surface*, Earth and Planetary Surface Processes Section;

2017: American Geophysical Union Fall Meeting (New Orleans), session convener: [3] *The Sustainability and Resilience of Coastal Systems; Creating Synergy Among Federal, State, and NGO Initiatives*, Global Environmental Change Section

2017: Geological Society of America Annual Scientific Meeting (Seattle), session convener: *Fluvio-deltaic processes and their stratigraphic record*, Clastic Sedimentology, Stratigraphy

2017: Lead Organizer: “The Second International Science Workshop of Huanghe (Yellow River) Delta”, Qingdao, China

2017: Participant, National Science Foundation Panel, Geomorphology and Land-use Dynamics

2016: Lead Organizer: “Bringing Together Selenga-Baikal Research Conference”, Chelan, Washington; meeting of international scientists to evaluate the state of hydrological, geomorphological, and sedimentological sciences for the Selenga River basin and Lake Baikal system

2016: Participant, National Science Foundation Panel, Coastal SEES

2016: Co-Editor, “Sustainable Water Management in Central Asia”, in *Environmental Earth Sciences*

2016: Geological Society of America South-Central Section Meeting (Baton Rouge), session convener, “Fluvial Forms and Processes and Gulf Coast Rivers and Groundwater”

2015: Participant, National Science Foundation Virtual Panel, Coastal SEES

2015: Lead Organizer: “The First International Science Workshop of Huanghe (Yellow River) Delta”, Zhengzhou, China

2015: Lead Organizer, Shell Oil workshop on river deltas at Rice University

2014: Lead Organizer, Hess Oil Company workshop on river deltas at Rice University

2014: Lead Organizer: “International Deltas Meeting: Genesis, dynamics, modelling, and sustainable development”, Istomino, Russia, an academia-industry sponsored workshop

2014: American Geophysical Union Fall Meeting, session convener: *Advances in understanding fluvial-deltaic processes and their interactions with tectonic settings* Earth and Planetary Surface Processes Section

2014: Geological Society of America Annual Scientific Meeting, session convener: *Bedforms: genesis and development processes, morphology, stratigraphy, and insights into planetary environment* Clastic Sedimentology, Stratigraphy

2014: Lead Organizer: ExxonMobil workshop on river deltas, Upstream Research Laboratory, Houston, Texas

2014: Lead Organizer: Industry-Rice Earth Sciences Symposium I (IRESS) “Imaging and sedimentary basin modeling”, Houston

2013: American Geophysical Union Fall Meeting, session convener: *Morphodynamic characteristics of non-normal flow conditions* Earth and Planetary Surface Processes Section

2011: American Geophysical Union Fall Meeting, session convener: *Evaluating Hydrodynamics and Sediment Transport in Lowland Rivers* Earth and Planetary Surface Processes Section

2011: American Geophysical Union Fall Meeting, session convener: *The Great Mississippi Flood of 2011: geomorphological, ecological and engineering effects and consequences*

2007-2010: Organizer: Softrock Seminar Brownbag Series, the Jackson School of Geosciences at the University of Texas

Awards and Fellowships

- 2019 Wageningen Institute for Environment and Climate Research (WIMEK) Fellowship, Wageningen University, The Netherlands
- 2018 111 Distinguished Foreign Expert, Tsinghua University (as administered by the Foreign Expert Bureau, and Ministry of Education, People’s Republic of China)
- 2014 Editors’ Choice Award, paper published in *Water Resources Research*
- 2013 Luna B. Leopold Award, American Geophysical Union, Earth and Planetary Surface Processes focus group, “*to a young scientist for making a significant and outstanding contribution that advances the field of Earth and planetary surface processes*”
- 2013 Sharp Lectureship, American Geophysical Union, Earth and Planetary Surface Processes focus group
- 2013 Thomas A. Philpott Excellence of Presentation Award, Gulf Coast Section, SEPM Annual Convention
- 2012 AGU editors’ citation for excellence in refereeing: *Water Resources Research*

Invited Presentations: Academia

- 2019: Wageningen University, The Netherlands
- 2018: University of Minnesota, Alvin G. Anderson Award Keynote Speaker
- 2018: Faculty of Geography, Lomonosov Moscow State University
- 2017: American Geophysical Union Annual Fall Meeting
- 2017: University of Wyoming, Department of Geology and Geophysics
- 2017: Tulane University, Department of Earth and Environmental Sciences
- 2017: The University of British Columbia, Canadian Geophysical Union Meeting
- 2016: Ocean University of China, Department of Marine Sciences, Qingdao, China
- 2016: University of Houston, Department of Earth and Atmospheric Sciences
- 2015: Bureau of Economic Geology, University of Texas at Austin

2015: Louisiana State University, Department of Geography
2014: Ocean University of China, Department of Marine Sciences, Qingdao, China
2014: Helmholtz Centre for Environmental Research, Leipzig, Germany
2014: University of Houston, Department of Civil and Environmental Engineering
2013: Sharp Lecture, American Geophysical Union, Earth and Planetary Sciences focus group capstone lecture, Fall Meeting
2013: International Association of Hydrological Sciences Assembly, Gothenburg, Sweden
Keynote speaker and invited paper
2013: Gulf Coast Associate of Geological Societies Annual Meeting, New Orleans, LA
2012: Louisiana State University, Department of Oceanography and Coastal Studies
2012: Rice University, Department of Earth Science
2012: Texas A&M University, Department of Geology and Geophysics
2012: Saint Louis University, Department of Earth and Atmospheric Sciences
2012: Massachusetts Institute of Technology, Department of Earth and Planetary Sciences
2012: University of Washington, Department of Earth and Space Sciences
2011: Coastal Estuarine Research Foundation 21st Biennial Conference, Daytona Beach FL
2011: Geological Society of America Annual Convention, Minneapolis MN
2011: Woods Hole Oceanographic Institute

Invited Presentations: Industry

2019: ExxonMobil Upstream Research Laboratory, Houston, TX
2016: ExxonMobil Upstream Research Laboratory, Houston, TX
2014: Chevron Research Group, Houston, TX
2013: ExxonMobil Upstream Research Laboratory, Houston, TX
2012: Shell Research Group, Houston, TX
